SUMMARY

I am an Information Technology undergraduate specializing in Software Engineering. Skilled in project management, software development, and leadership. Experienced in managing tasks, coordinating teams, and delivering real-world projects during internships, I have a proven ability to align technical expertise with project goals to achieve efficient and impactful results. Seeking a challenging project management role where I can leverage my skills, contribute to successful project outcomes, and foster both team and professional growth.

WORK EXPERIENCE

Full Stack Developer, Saradha Lanka Agro (Pvt) Ltd

August 2023 - Present

- Developed a complete e-commerce web application using the MERN stack (MongoDB, Express.js, React, and Node.js).
- Currently leading the development of an ERP system and a CRM system.
- ERP System: Built using Laravel (backend), MySQL, Blade + Tailwind CSS (frontend), and Alpine.js for interactivity.
- CRM System: Developed with Laravel backend, Supabase database, and Next.js + TypeScript frontend.
- Designed and optimized database schemas for scalability and security.
- Implemented authentication, reports, and real-time dashboards.

Associate Software Engineer, ERP Lanka (Pvt) Ltd

June 2024 - August 2025

- Contributed to the design and development of ERP, CRM, HRM, and hotel management systems.
- Integrated GraphQL into the CRM system to improve data insights and automation.
- Created custom plugins and Chrome extensions for productivity and workflow enhancement.
- Built and maintained complex SQL reports and dashboards for management.
- Implemented backend APIs, optimized query performance, and handled bug fixing.
- Collaborated with cross-functional teams to deliver client-specific modules.
- Gained hands-on experience with project planning, deployment, and testing.

PROJECTS

Leave-Management-System - 2025

- Full-featured Leave Management System is a tool that helps companies or teams track and manage employee leave requests.
- Employees can apply for leave online, and managers can approve or reject leave requests without paperwork. The system also connects with Monday.com Dashboard and a Telegram Bot to make approvals faster and smarter
- Tech Stack: Node.js, PostgreSQL, React.js, Express.js and Tailwind CSS.

EV Charging Station Management System - 2025

- Designed and developed a web-based EV Charging Station Management System to monitor and manage electric vehicle charging stations.
- Implemented features to track charger availability, manage charging sessions, and display station status in real time.
- Built a user-friendly dashboard for station operators to manage charging points efficiently.
- Developed backend APIs to handle charging data, session tracking, and station management.
- Focused on creating a scalable and future-ready system for growing EV infrastructure.
- Tech Stack: Java, Spring Boot, MySQL, REST APIs, HTML, CSS, JavaScript.

SalesOptimizer – AI-Powered Integration Gateway -2024

- Built a universal integration gateway similar to a payment SDK that can connect with any system.
- Implemented AI-driven forecasting dashboards to analyze and predict sales performance.
- Created the mobile app with Flutter and the admin dashboard with Next.js for a modern, responsive user experience.
- Designed RESTful APIs for communication between mobile and web clients.
- Tech Stack: PHP (Laravel), MySQL, AJAX, JavaScript, HTML/CSS, Bootstrap.

Food Delivery System (Microservices ARC)-2024

- Developed the restaurant-side interface for a microservices-based food delivery platform.
 - Built the backend using Spring Boot, ensuring scalability, modularity, and smooth inter-service communication.
 - Integrated GPT-4.0 for generating SEO-friendly product descriptions and topic suggestions.
 - Implemented real-time location tracking with Google Maps APIs, enabling efficient delivery and order visibility.
 - Tech Stack: Spring Boot, React + Vite, Kafka, MySQL, Google Maps API, OpenAI GPT-4.0 API.
- Job Sheet Extension (Chrome Extension)-2025**
- Developed a Chrome Extension to help employers manage job sheet reminders and track daily tasks efficiently.
 - Designed features to improve productivity by scheduling reminders, managing task lists, and sending alerts for due work.
 - Focused on clean UI, fast performance, and reliable local storage handling for offline usage.
 - Tech Stack: JavaScript (ES6), HTML5, CSS3, Chrome Extension APIs, Manifest V3.

TECHNICAL SKILLS

Backend Development • Node.js • Express.js • ASP.net • Springboot • Laravel	Frontend Development • React • JavaScript • Tailwind CSS • Flutter • Bootstrap • HTML5 • CSS3
Database Management • Mysql • SQL lite • MongoDB • Radis • PostgreSQL	Tools & Version Control • Git/Github • Postman • Figma • Docker • Kubernetes

SOFT SKILLS

- Adaptability
- Problem-Solving
- Team Collaboration
- Software Testing
- Agile Development
- Creativity
- Time Management
- Communication

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT) • Undergraduate in BSc. (Hons) in Information Technology Specializing in Software Engineering • Higher Diploma in Information Technology	2022 - present
St Mary's College, Kegalle • Secondary Education	2012 - 2021
